Exhibition space created by Thomas Olbricht:
me Collectors Room

In a series of rotating exhibitions, they showcase the Olbricht Collection, containing works ranging from the early 16th century up to the present day. Selected curators are invited to tell their own perspective on the collection, whose driving focus draws on the core themes of human existence: life, love, eros, transience and death.

More details about the collection:

The „ME“ in the name „me Collectors“ stands for moving energies. The exhibition space is meant to be an art hall rather than just another museum, an adventure world for collectors, curators and all other art interested travelers.

The me collectors room may be used for various representative event concepts. The high quality interior provides representative areas for fine dining, lounges or other high level events.
